Subject: GenX Inquiry

Good morning Mr. Cambre,

My name is Tyler Wittkofsky, Public Information Officer with Brunswick regional Water and Sewer H2GO. We are a water supplier in the area impacted by the recent GenX discovery. Sadly, we were not invited to the closed door meeting despite a request to be there on behalf of our customers. On behalf of the 10,000+ customers (23,000+ population) that H2GO serves in the northeast Brunswick County service area, I believe it essential that a direct understanding of the current situation be relayed to our customer base, and I would like to ask a few questions of you:

1. Could you provide me with a copy of your NPDES permit to discharge into the Cape Fear River?
2. What studies, if any, has Chemours done on GenX?
3. What studies, if any, does Chemours plan to do on GenX?
4. Did Chemours know of the potential dangers of GenX before discharging it into our water?
5. What are Chemours plans from here on out to help put the citizens of the Cape Fear Region's mind at ease?
6. What is the difference in GenX and C8? What studies were done to provide these differences?
7. Finally, is our water safe to drink?

Thank you for your time,

Tyler Wittkofsky, PIO
