- I have been informed of the proper operations of the smart irrigation controller and information was provided for continued technical support and customer service assistance.
- I certify that as required of the smart irrigation program, on-site weather monitoring or active weather data subscription is currently maintained and will be maintained. I will notify H2GO upon cancelation of weather data subscription or removal of the on-site weather monitoring.
- I have been informed that the Smart Irrigation Program incentive water rate is subject to change back to the standard irrigation rate, if the controller is switched to manual operation on a continuous basis and is passing the smart mode and or if any requirements of the program aren't satisfied.
- I have and will maintain the required backflow assembly and have it tested and certified annually. A copy of the latest test will be attached with this application.
- I will have the irrigation system with a smart controller maintained and certified annually.
