EDU Definition

*An EDU or "Equivalent Dwelling Unit" is defined as one single-family residential household. It is the unit of measure by which the user is charged for water and sewer fees for services provided by H2GO. Connection fees (i.e., capital recovery fees and impact fees) from each user (e.g., single-family residential, multi-family residential, commercial) are calculated and imposed upon improved property served in accordance with H2GO Rules and Regulations based upon projected water usage by, and/or wastewater generated from, the user at a rate of 210 gallons per day (gpd) per EDU. Projected commercial water and wastewater flow rates submitted by Owner or Owner's Engineer or as allowed by North Carolina State standard (as defined in 15A NCAC 02T .0114) shall be approved by H2GO's Executive Director and will be used as the EDU basis for water and sewer connection fees.
